Visual Spot Diagnoses - Survival Guide for Primary Care

Dr. Linda Chan

Department of Family Medicine
& Primary Care

Lecture Outline

- Diagnose common “spot diagnoses” in primary care
 - Distinguish the abnormal from the normal
 - Describe the abnormality
- Differentiate lesions with similar appearances
 - Look for the pathognomonic sign
- Identify uncommon but important “spot diagnoses”

Spot Diagnosis

C/O: Doctor, please look at this lesion...

FIRST: Look at your patient and find out what he/she is trying to show you!!!!

- Normal, variant vs. Abnormality
- Describe the lesion(s):
 - Location(s), distribution
 - Shape, color, surface / border
 - Size, consistency
 - Associated signs: discharge, crusting, scaling, bleeding....
 - ?Pathognomonic sign
 - Match it to your DDx list!
